Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U. S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0933-5846, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of volume 35

Abraham, U., Shelah, S.: Martin's axiom and Δ^2_1 well-ordering of the reals 287

Buchholz, W. → Mints, G.
Buss, S. R., Clote, P.: Cutting planes, connectivity, and threshold logic 33

Clote, P. → Buss, S. R.

Esteva, F. → Hájek, P.

Gitik, M.: On hidden extenders 349
Godo, L. → Hájek, P.
Grohe, M., Hella, L.: A double arity hierarchy theorem for transitive closure logic 157

Hájek, P., Godo, L., Esteva, F.: A complete many-valued logic with product-conjunction 191
Hella, L. → Grohe, M.
Hjorth, G.: Some applications of illfoundedness 131

Kamburelis, A., Węglorz, B.: Splittings 263
Krivtsov, V. N.: Creative subject, Beth models and neighbourhood functions 89

Lipparini, P.: Ultrafilter translations. I. (λ, λ)-compactness of logics with a cardinality quantifier 63
Luppi, C.: On the interpolation property of some intuitionistic modal logics 173

Magidor, M., Shelah, S.: The tree property at successors of singular cardinals 385
Marshall, M. V.: Types in class set theory and inaccessible cardinals 145
Mints, G., Tupailo, S., Buchholz, W.: Epsilon substitution method for elementary analysis 103
Montagna, F.: An algebraic treatment of quantifier-free systems of arithmetic 209
Montagna, F., Simi, G., Sorbi, A.: Logic and probabilistic systems 225

Pawlikowski, J.: Every Sierpiński set is strongly meager 281

Quatrini, M.: A denotational semantics of $LC2$ 1

Rosłanowski, A., Shelah, S.: More forcing notions imply diamond 299
Rosłanowski, A., Shelah, S.: Localizations of infinite subsets of ω 315

Shelah, S. → Abraham, U.
Shelah, S. → Magidor, M.
Shelah, S. → Rosłanowski, A.
Shelah, S.: Large normal ideals concentrating on a fixed small cardinality 341
Simi, G. → Montagna, F.
Sorbi, A. → Montagna, F.

Tupailo, S. → Mints, G.

Węglorz, B. → Kamburelis, A.
Woodin, W. H.: The universe constructed from a sequence of ordinals 371

To Azriel Levy 279
